CSS

HTML

Testing(basic) - Cypres/Jest

AirTable

Languages

English	B1
Norwegian	B2
Polish	C2

Hobbies

Music

Sport

Finances/CryproCurrency

Coding

Daniel Hys

I have a solid knowledge of HTML, CSS, and JavaScript, React which I constantly improve through self-created projects and regular training. I have worked on several projects where I was responsible for creating responsive user interfaces and implementing functionality.

AboutMe

I am ambitious, young, and determined. I never shy away from challenges; instead, I see them as opportunities for growth. Working in a team environment is where I thrive, drawing energy and inspiration from collaboration. I am committed to achieving success and constantly strive to improve my skills. Eagerness to learn and dedication to projects are my priorities, allowing me to contribute effectively to the team's success.

MyPortfolio

YourCar Project in NextJS, TypeScript, Sass, Redux:

In the project, I showcased my skills in the Next.js framework by creating various API endpoints and interacting with the AirTable database. Additionally, I implemented payments using Stripe and managed images with Cloudinary. The project includes interfaces for both administrators, enabling order management, and users, facilitating order placement and offer browsing. This project not only demonstrates my technical abilities but also my capacity to create practical solutions for users.

Travel Agency Project in TypeScript, React, and Sass:

1. Written in TypeScript for greater clarity and code safety.
2. Using React to create multiple views and components.
3. Styling with Sass, used BEM methodology.
4. Utilized REST API for update weather.
5. Using of various libraries in React. (Router, Redux, Redux-Saga, Redux-Persist, Bootstrap, MaterialUI, Leaflet, Slick, Axios and other).
6. Using advanced patterns (HoC, my customs Hooks).

MyWebSite

A website written in pure JavaScript demonstrating my ability to work with the language effectively. Additionally, a personal webpage representing myself, my plans, and ambitions for the future.
